CD 2000

The bipolar corona discharge CD 2000 is used to neutralize the charge of a dust or liquid aerosol or even to electrically charge it, as required. For this purpose, a current is set on the positive and negative high voltage source so high that it is still entirely conducted through the corona discharge generated at the tip in the corona chamber, but no (or few) sparks are generated. This current is programmed via the current limitation of the HV power supplies. The voltage limitation is set slightly higher than is necessary for the current determined, such that this current flows under all circumstances (temperature, condition of the electrode). The positive and the negative high voltage supplies and the CD 2000 are independent of one another and are independently adjustable.

BENEFITS

- No operation license is required for radioactive instruments
- Bipolar discharge through negative and positive ions
- Applicable for solid and liquid aerosols
- Robust design
- Simple operation
- Reliable function
- Low maintenance
- Reduces your operating expenses

APPLICATIONS

- Discharge of electrically charged aerosols
- Aerosol research
- Filter testing

MODEL VARIATIONS

CD 2000 Type A Bipolar discharge unit with lower mixed air flow https://www.palas.de/product/cd2000a

CD 2000 Type B Bipolar discharge unit with higher mixed air flow

DATASHEET

| Reported data | Voltage: $0 - 6,000 V \stackrel{\wedge}{=} 0 - 10$ VPwer: $0 - 1,000 \ \mu A \stackrel{\wedge}{=} 0 - 10 V$ | Volume flow (mixed air) | Type A: for $2 - 18 \text{ m}^3/\text{h}$, type B: for $3 - 36 \text{ m}^3/\text{h}$ |
|----------------------------|---|--------------------------------|---|
| Volume flow (suction flow) | $0 - 4 m^3/h$ | Power supply | 115 – 230 V, 50/60 Hz |
| Power consumption | 50 W | Aerosol outlet connec- tion | Aerosol and fed mixed air, $Ø_{inside} = 12 \text{ mm}, Ø_{outside} = 16 \text{ mm}$ |
| Mixed air connection | Cleaned pressurized air, type A: $Ø_{inside} = 6 \text{ mm}$, $Ø_{outside} = 8 \text{ mm}$, type B: $Ø_{inside} = 13 \text{ mm}$ | Operation principle | lonization with corona |
| Mains fuse | F 3,15 A, 250 V | Aerosol inlet connecti- on | Ø _{inside} = 6 mm,Øoutside= 8 mm |
| Special features | Positive and negative high vol- tages are provided by two independent power supplies, maximum voltage: ± 6,000 V, maximum power: ± 1,000 µA | | |
