

DEMC 1000

The DEMC size classifier (as defined in ISO 15900:2000) selects aerosol particles from an aerosol stream according to their electrical mobility. Different lengths of columns are available depending on the size range to be selected. Depending on the configuration of the control unit and column, the designation changes accordingly.

BENEFITS

- The user is able to select any size within the defined size range.
- The DEMC can be connected to many counters to form an SMPS.
- Continuous and fast-scanning principle of measurement
- Graphic display of measurement values
- Intuitive operation using 7" touchscreen and GUI
- Integrated data logger
- Low maintenance
- Reliable function
- Reduces your operating expenses

APPLICATIONS

- Calibration of condensation particle counters (CPC)
- Monodisperse particle source
- System component of an SMPS

MODEL VARIATIONS

DEMC 1000 X

Differential electrical mobility classifier from 4 – 600 nm with integrated X-ray ionization

DATASHEET

| | | | |
|----------------------------|---|--------------------------|---|
| Volume flow (sheath air) | 2.5 – 14 l/min | Size channels | Max. 256 (128/decade) |
| User interface | Touchscreen, 800 • 480 pixel, 7" (17.78 cm) | Data logger storage | 4 GB |
| Software | PDAnalyze | Classifying range (size) | 4 – 600 nm |
| Installation conditions | +5 – +40 °C (control unit) | Impactor | Nozzle for 3 different cut-offs |
| Adjustment range (voltage) | 1 – 10,000 V | Data Management | Prepared for connection to the Palas Cloud MyAtmosphere ("MyAtmosphere-ready"); internet access and separate registration required. MyAtmosphere terms and conditions of use apply. |
